

# Search Limiters

Narrow or broaden your search

# Boolean Operators

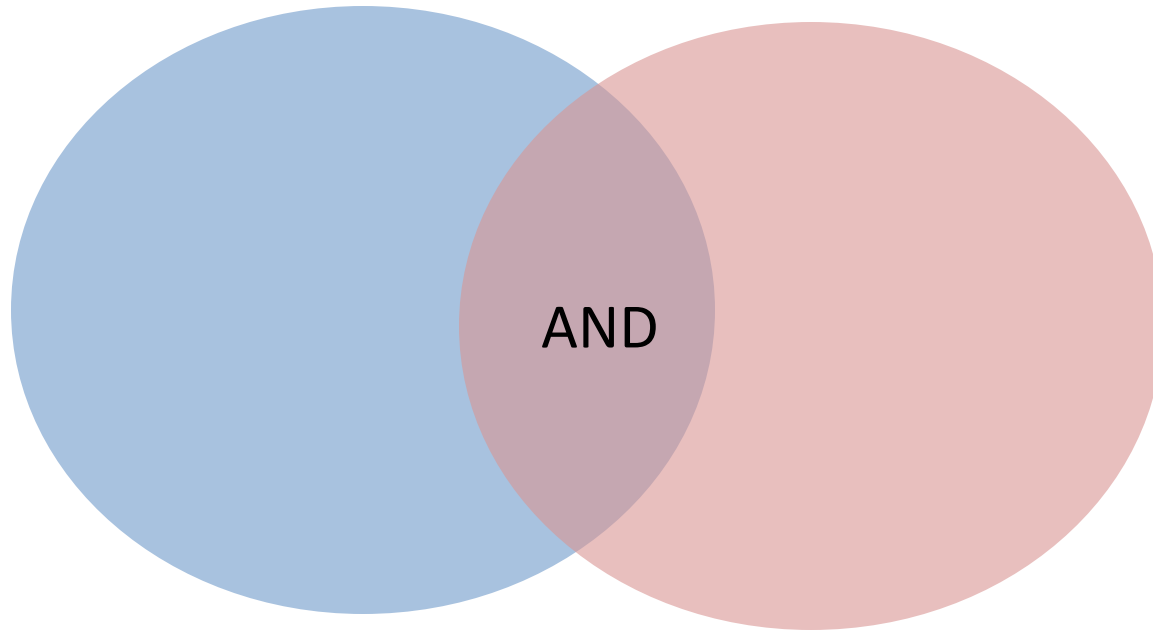

Define a relationship between search terms

AND

OR

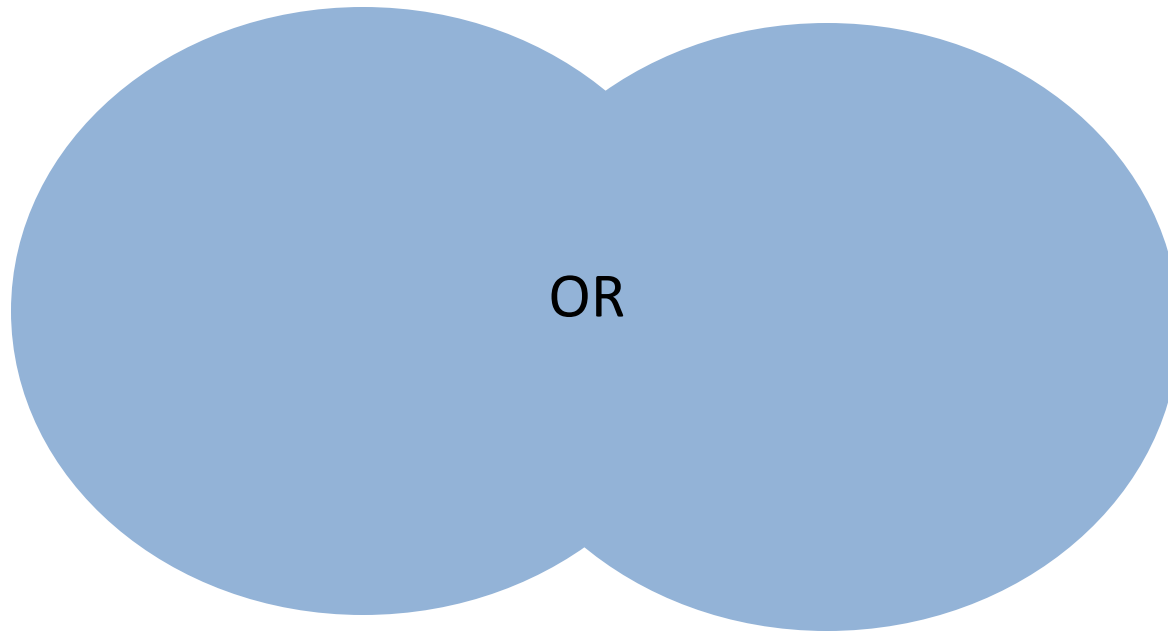

NOT

# Boolean Operators

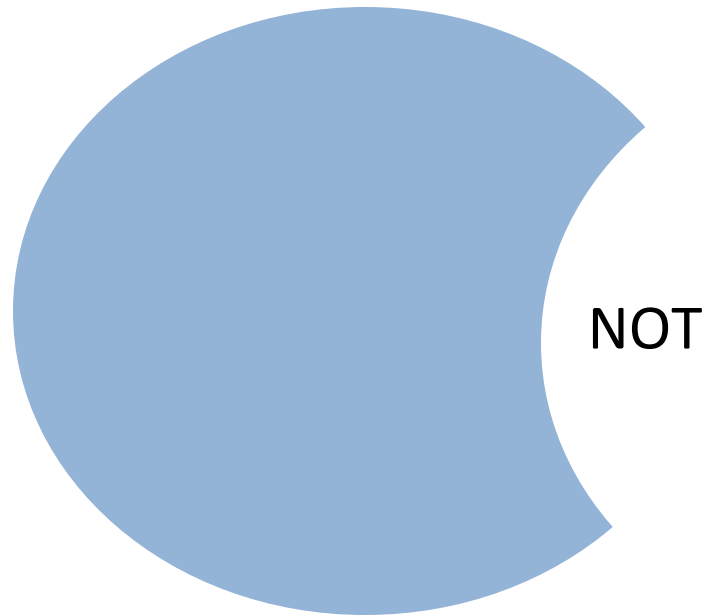

Both words must be present in the record for it to be retrieved. This limits the results of a search.

# Boolean Operators

Either word or both words must be present in the record for it to be retrieved. Using OR will expand your results.

# Boolean Operators

The first word must be present, but not the second word for the record to be retrieved. NOT forbids the second word from appearing in your results.

# Parentheses

(migraine AND medicine) AND (symptoms OR cause)

# Quotation Marks

“surgical technician”

# Truncation

educat\* will find education, educate, educated, educating, etc.
